Visual Speed and Accuracy Test VKT

This test consists of 150 pairs of symbols and you have 10 minutes to complete the test. Please compare the two symbol sequences next to each other and decide whether they are identical (the same symbols in the same order) or different. Please indicate your answer by clicking the box on the same line. Please give as many answers as you can during the prescribed time.

If you have taken the test already <u>within two previous years</u>, please tell that to the person who gave you the test. In that case, he or she will get an automatic notification that you have taken the test before, and the date of your previous test.

Examples:

123123	123321	◯ identical	⦿ different
qdf2121sa	qdf2121sa	⦿ identical	◯ different
%#@&?	%{@&?	◯ identical	⦿ different

I HAVE READ THE INSTRUCTIONS CAREFULLY. I AM READY TO PROCEED WITH THE TEST!
